

Policy Patrol *Email*

Spam Filter

POLICY PATROL SPAM FILTER

Policy Patrol Spam Filter offers advanced anti-spam using Bayesian filtering, header and keyword analysis, real-time black lists & SURBL and Sender Policy Framework. By blocking unwanted messages, Policy Patrol Spam Filter reduces network traffic, and improves employee productivity. In addition, Policy Patrol Spam Filter reduces bandwidth usage and message storage requirements, providing significant cost savings. Policy Patrol is used by companies such as USA.net, Nissan, Daewoo, Targus, Canadian Pacific Railway, Lotto and many more.

BENEFITS

REDUCE BANDWIDTH USAGE

INCREASE PRODUCTIVITY

AVOID CONGESTION

REDUCE STORAGE NEEDS

BAYESIAN FILTERING

Policy Patrol uses Bayesian filtering to statistically analyze email content in order to determine whether a message is spam or legitimate.

REAL-TIME BLACK LISTS & SURBL

By using real-time black lists & SURBL lists Policy Patrol can block large amounts of spam.

SENDER POLICY FRAMEWORK (SPF)

Policy Patrol can use the Sender Policy Framework (SPF) to verify email senders and therefore block spoofed emails and thwart phishing attacks.

HEADER CHECKING

Policy Patrol accurately identifies spam by making use of a sophisticated scoring system for common spam characteristics.

KEYWORD FILTERING

Policy Patrol includes advanced keyword filtering. By removing HTML tags before checking the email text, spammers cannot circumvent Policy Patrol filters by placing HTML tags within the text.

WHITE AND BLACK LISTS

Policy Patrol allows you to create your own white lists and black lists and can add entries automatically. Users can also update white and black lists through public folders and mailboxes.

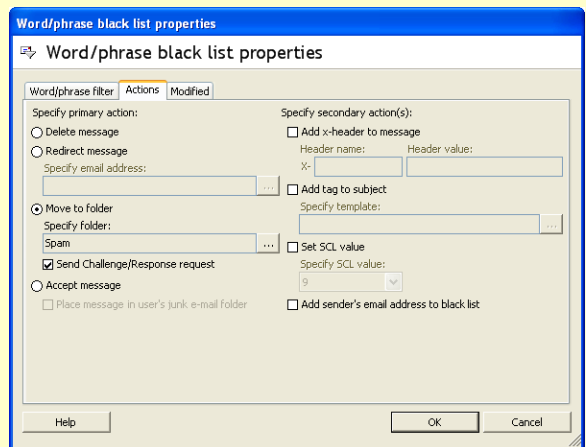

CHALLENGE/RESPONSE

Policy Patrol includes a refined challenge/response system that allows you to specify in which instances to send the challenge/response email. In this way you can for instance only send the verification request when you suspect spam.

Try it out for free! Download a fully working 30-day evaluation version from:

SYSTEM REQUIREMENTS

- Windows 2000/2003 or Windows XP Professional.
- Microsoft Exchange 2000/2003/5.5, Lotus Notes/Domino or other mail server.
- Microsoft .NET Framework

REPORTING

Administrators can receive daily, weekly or monthly anti-spam reports containing detailed spam statistics.

QUARANTINE, DELETE, FORWARD & MODIFY

Policy Patrol can reject, quarantine, delay, delete, forward to user's junk mail folder, add a custom header or add a tag to the subject of spam messages.

STOP SPAM RIGHT OUT OF THE BOX

Policy Patrol includes a default configuration that can start blocking spam immediately after installation.

SAVE BANDWIDTH & STORAGE

Since Policy Patrol performs certain spam filtering methods before receiving the message, the product can save you valuable bandwidth and storage space.

AUTOMATIC UPDATES

Regular updates are released in order to keep ahead of new spam tactics. Policy Patrol automatically downloads anti-spam updates as soon as they are available.
