

POLICY PATROL ZIP

Take control of your email.

▲ POLICY PATROL ZIP

Policy Patrol Zip allows users to compress and decompress email attachments at server level. Compression rules can be user-based and applied to incoming or outgoing mail, and internal or external messages. By decreasing the size of emails, Policy Patrol Zip reduces network congestion and improves employee productivity. In addition Policy Patrol Zip reduces bandwidth usage and message storage requirements, providing significant cost savings.

▲ BENEFITS

REDUCE BANDWIDTH USAGE

INCREASE PRODUCTIVITY

AVOID CONGESTION

REDUCE STORAGE NEEDS

COMPRESS ATTACHMENTS

Policy Patrol can compress all attachments, or only attachments of a certain size or format. Attachments can be compressed into one archive or into a separate archive for each attachment.

DECOMPRESS ATTACHMENTS

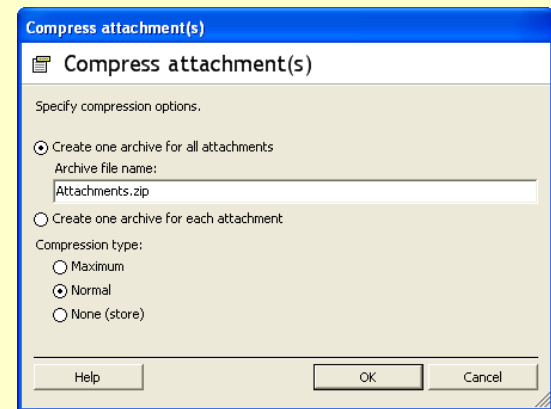

Policy Patrol can automatically decompress zip archives to save users having to unzip attachments themselves. By indicating a maximum extracted file size, you can prevent attachments from becoming too large.

INTERNAL AND EXTERNAL

Attachments can be compressed and decompressed for external as well as internal mails (if installed on Exchange 2000 or Exchange 2003). Since Policy Patrol can distinguish between internally and externally sent mails, different compression rules can be applied to each.

FLEXIBLE RULES

Compression rules can be applied to selected users, groups, domains or public folders and can have user or group exclusions. Exceptions can be applied for certain recipients or senders or when a code is found in the subject.
